Subject: Balancing Technology with Cybersecurity Needs in Kansas, STiR Now Accepting Applications
Date: Friday, May 17, 2019 7:32:02 AM

GOVTECH TODAY

MAY 17, 2019

Delivering results and laying a strong foundation for a stronger Minneapolis. Meet Mayor Jacob Frey at the Summit on Government Performance and Innovation.

Balancing Technology with Cybersecurity Needs in Kansas

Kansas Chief Information Technology Officer Lee Allen explains how, in addition to implementing agency-level security, he gives his CISO the autonomy he needs to protect the enterprise at large. READ MORE

THOUGHT LEADERSHIP PAPER

Taking a Fresh Look at Hybrid IT Environments

Research shows that state and local government CIOs are taking a stepped approach to the cloud by running hybrid cloud environments – or a mix of on-premises data centers, private clouds, software-as-a-service (SaaS) applications and public cloud IT infrastructures. DOWNLOAD NOW

Creating the Ultimate Government Experience

Design thinking methodologies play a vital role in helping government deliver valuable services and become more responsive to citizens. As technological change and citizen expectations continue to evolve in the years ahead, the user-centric approach to creative problem solving will become even more important. Austin, Georgia and New York are already demonstrating how and why.
